Sustainable Living with Eco Communities

Full Circle is more than a shop — it's a not-for-profit built to give back. Every purchase supports refill, reuse and repair, with all proceeds funding community projects right here in Cheshire.

Why Fill?

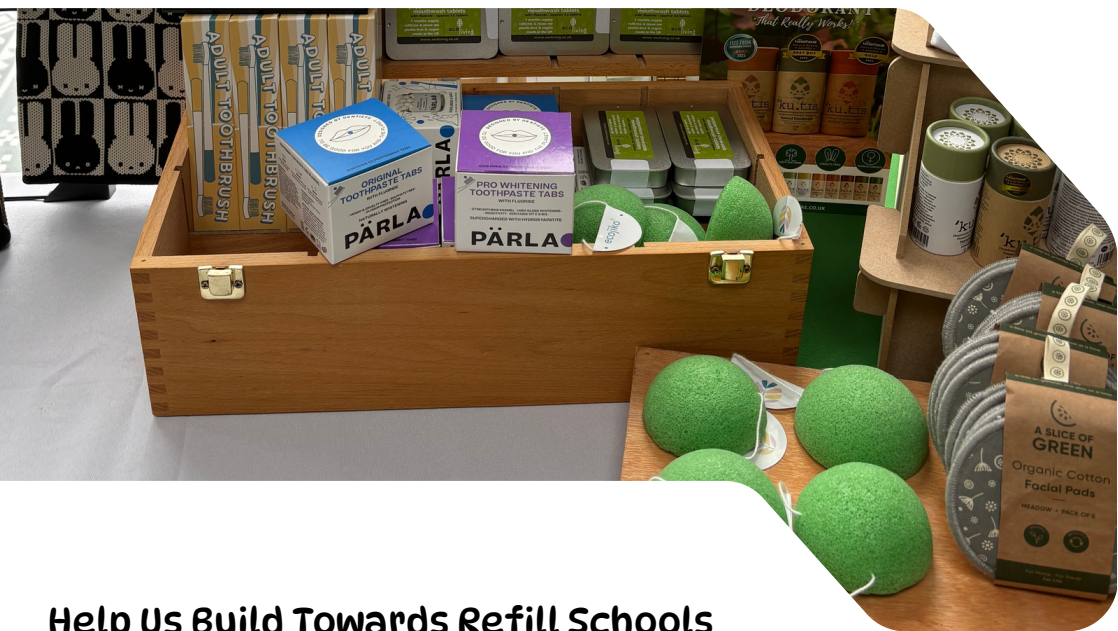

Fill products are made by a family-run company, formulated and manufactured in their own factory in Northamptonshire.

Transparency, provenance and good chemistry sit at the heart of everything they do — every ingredient is sustainably sourced, cruelty-free, vegan and biodegradable.

Beyond safe, sustainable chemistry, Fill is built around refillable and recyclable packaging, at prices that make sustainable living genuinely accessible. Products that work brilliantly, look great, and help cut plastic waste — that's the standard.

Shop with purpose. Every refill, every reuse, every repair funds real change in Cheshire's communities.

Help Us Build Towards Refill Schools

Every purchase through Full Circle already funds our work across Cheshire, but we're aiming higher. This month, we're launching a Spacehive campaign to bring **Refill Schools** to life: a retail trial in two primary schools, giving pupils and staff the equipment, resources and training to run their own refill and reuse scheme. Alongside this, we'll deliver circular economy workshops and assemblies in up to 25 schools, helping the next generation understand reduce, reuse, repair, refill and repurpose, not just in theory, but hands-on.

Shopping with us today helps build momentum before we launch. The stronger our support looks going into Spacehive, the stronger our case to Cheshire that this project deserves backing.

Sustainable Kitchen

Small swaps in the kitchen make a big difference. Our Refill range of laundry, wash up and cleaning liquids – plus our reusable kitchen essentials – cloths, pot brushes & scourers – helps you cut down on single-use plastic without cutting corners on quality.

Shop with purpose. Every refill, every reuse, every repair funds real change in Cheshire's communities.

Gift / New House/ Starter Kit

Kitchen Gift/ Starter Kit

500ml Wash Up -
Ginger
tea Towel and
dishcloth
Quirky
Dishbrush
Coconut scourer

Dishcloths

Eco-friendly washable dishcloth, perfect for doing the dishes, wiping up spills or cleaning. Made from natural wood pulp cellulose, from sustainably managed forests, and cotton from waste cotton. This combination allows them to be rigid when dry and pliable when wet. They are more durable and absorbent than regular paper towels and can be placed in the top rack of the dishwasher or washing machine (up to 90C) to clean them. They are also 100% compostable so after their long and useful life, simply pop them in your compost heap.

Organic Tea Towels

Organically grown cotton yarn is kinder to the environment as it uses less water, reduces soil erosion and does not use hazardous manmade pesticides. It also benefits the farmers who can grow additional crops alongside the cotton and maintains the biodiversity of the soil

Sponges

Plastic Free
Compostable Sponges,
100% Plastic Free, Made
of Renewable Sources,
Suitable for Vegans

Scourers

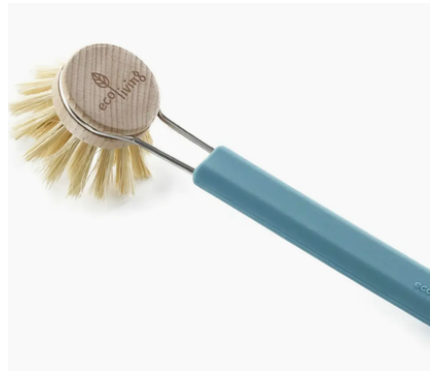

Coconut Scourers are your 100% natural, plastic-free sustainable swap to the usual plastic scourers. Designed for those who want to keep both their home and the planet spotless. These coconut coir scourers offer a powerful yet gentle scrub for all your washing-up needs.

Eco Steel Scourers, 100% Plastic Free, Suitable for Vegans. A set of 3 galvanised steel scourers. Plastic free, reusable and recyclable heavy duty scourers. Sponge like cleaning pads, for tough removal of dirt. Anti-rust

Pot Brushes

A dish brush with natural plant-bristles. Plastic-free, vegan and has an FSC® beech wood replaceable head. The brush head is removable and replaceable; the standard refill heads from our other range fit this brush. The handle is endlessly reusable with a mix of silicone, stainless steel. Tree planted for every brush sold.

Our stock of Geeky Scrubbing Brush crafted with durable, plant-based sisal bristles and fun eyes! This versatile brush is designed for more than just scrubbing pots and pans— it's perfect for cleaning cookware, brushing furniture, and even scrubbing vegetables.

Sustainable Bathroom

Our Refill bathroom range — body wash, micellar water, shampoo and conditioner — lets you top up again and again instead of buying new plastic bottles each time. Simply bring your own bottle, or pick up a Full Circle refillable one to start.

From compostable loofahs to konjac sponges and organic cotton facial pads, our plastic-free bathroom essentials swap out single-use products for ones that last — kinder to your skin, and to the planet.

Shop with purpose. Every refill, every reuse, every repair funds real change in Cheshire's communities.

Bamboo cloth, boxed. [click here](#)
Add the bag from recycled cement sacks,
with a small loofa. [Click here](#)

Face Starter Kit

500ml Micellar Water
100ml Micellar Water
5 face rounds,
Beauty Sponge
(Konjac plant)
[click here](#)

Organic Cotton Facial Pads

organic cotton facial pads are designed as a replacement for disposable, single use cleansing wipes or cotton wool and make a great addition to the plastic free bathroom.

Plant Based Natural Beauty Sponge

Crafted from the root of the konjac plant, this all-natural sponge is a game-changer for your skincare routine. When dry, it feels firm to the touch, but once moistened, it transforms into a silky-soft sponge that's incredibly gentle on the skin. Perfect for sensitive areas like delicate skin or for everyday tasks such as makeup application and removal

Loofah

Our organic loofahs can be used as a sponge in the shower or bath, or they can be used as a household cleaning tool to scrub your floor tiles, hardwood furniture and much more!

Loofahs are part of the cucumber family! The loofah fruit grows on vines and when ripened, it's removed and dried, where it transforms into an effective natural cleaning utensil!

On the Go Recycled Bags

Carry your everyday with a lighter footprint. Our recycled bags are knitted from 100% recycled yarns or woven from repurposed cement sacks — proof that sustainable doesn't mean sacrificing style. Check out these and more. [click here](#)

Eco Makes

Great eco makes to keep everyone entertained, at minimal cost. Plastic-free, creative, and kind to the planet. All £3.50 each— [shop here](#)

Eco Makes

The Mindful Gardener

Slow crafting for busy minds. Make your own paper plants, a calming, plastic free way to unwind.

Refill & Save

Eco Communities Full Circle Shop is a community led, not-for-profit project helping households across Cheshire reduce single use plastics and live more sustainably. No physical shop, no staff, just a growing community of people thinking differently about what we bring into our homes.

What the 'Refill' project does

Our refill project allows people to reuse 'Full' bottles again and again for:

- Laundry detergent and conditioner
- Household cleaning products
- Hair and body care products

Refillable – Full Bottles

Start with a full bottle, either from one of our kits or here. The Full bottles have the ingredients listed, which is a legal requirement. Check the range of cleaning, laundry, hair and body product. Shop Full Bottles here – [click here](#)

Refill

Once you have used your full bottle you can buy just the liquid. Shop Refill here – [click here](#)

Thank you for supporting Eco Communities UK CIC. As a not-for-profit, every purchase you make helps fund our community projects across Cheshire, from refill schemes to reuse initiatives that make sustainable living easier for everyone.
